***Election/R strictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-10 and 13, drawn to an isolated nucleic acid molecule and a method for *in vitro de novo* methylation.

Group II, claim(s) 11 and 12, drawn to an isolated polypeptide molecule.

Group III, claim(s) 14-16, drawn to a method for diagnosing or determining a susceptibility to neoplastic disorders.

Group IV, claim(s) 17, drawn to an isolated *de novo* DNA cytosine methyltransferase polypeptide having the amino acid sequence encoded by the cDNA clone, ATCC Deposit No. 209933.

Group V, claim(s) 18, drawn to an isolated *de novo* DNA cytosine methyltransferase polypeptide having the amino acid sequence encoded by the cDNA clone, ATCC Deposit No. 209934.

Group VI, claim(s) 19, drawn to an isolated *de novo* DNA cytosine methyltransferase polypeptide having the amino acid sequence encoded by the cDNA clone, ATCC Deposit No. 98809.

Group VII, claim(s) 20, drawn to an isolated *de novo* DNA cytosine methyltransferase polypeptide having the amino acid sequence encoded by the cDNA clone, ATCC Deposit No. 326637.

Group VIII, claim(s) 21, drawn to an isolated *de novo* DNA cytosine methyltransferase Dnmt3b polypeptide from SEQ ID NO: 2..

Group IX, claim(s) 22, drawn to an isolated *de novo* DNA cytosine methyltransferase DNMT3B polypeptide from SEQ ID NO: 4.

Art Unit: 1642

Group X, claim(s) 23, drawn to method of screening for an agonist/antagonist of DNMT3.

2. The inventions listed as Groups I-X do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: they consists of different products, for instance polynucleotides and polypeptides which are made by totally different processes. The polypeptides are different due to the fact they are encoded by structurally and functionally different polynucleotides and a search of one would not be the search of the other. The methods of Groups I, III and X require different reagents and yield different endpoints.

3. A telephone call was made to Karen R. Markowicz on October 1, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1642

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
